

# Acid Brite NCT

Acid Brite NCT is a specialty blend of inorganic and organic acids that are designed to provide the acidity of hydrochloric acid while exhibiting a significantly reduced corrosivity to skin and ferrous substrates. Acid Brite NCT is safer to use than hydrochloric acid and should be evaluated for use in cleaning, deoxidizing, and de-scaling formulations. The Acid Brite NCT is not considered corrosive for transportation purposes by the U.S. Department of Transportation.

## Features & Benefits

Non-corrosive to skin	Safer to work with
D.O.T. non-corrosive	Lower shipping cost
Low fuming	Safer work environment

## Typical Applications

- Dissolving calcium and other hard water scales
- Dissolving rust and oxidation
- Brick cleaning
- Transportation cleaning
- Facility maintenance

## Operating Conditions

### Equipment

Acid resistant such as Polyethylene, Polypropylene, or PVC.

## Caution

Strong acid. Not to be taken internally. Corrosive to aluminum. Use with adequate ventilation.

Read and understand OSHA Safety Data Sheet prior to using or working with this product. People handling and working with this product should be properly trained in safe handling of liquid acids. Eye wash and safety shower should be readily accessible in areas in which this product is used, handled and stored.
